Subject: Waste Pits

Gary and Donn,

Please see the attached photos and the link below to a video of the Pits shot from a drone. Reports are coming in from the river bottom that some homes have been swept off their slabs (photo showing only a portion of a submerged home is one example).

I am sure you are following flood gauge data and I am curious if you have an idea of when a dive team will be able to assess the Pits? It is essential that divers or an ROV perform a thorough underwater inspection of whatever is left of the Site. Please let me know what the agency is planning moving forward, as many residents are contacting me concerned about the Pits.

Thank you,
Jackie
